Data Analyst with over 2 years of experience in many BI Tools like Power BI, SQL and Python specializing in data visualization, automation, ETL, data modeling, dashboard development and storytelling to deliver actionable business insights

Top Skills

- **Python** - Skilled in data wrangling, analysis and automation using Pandas and NumPy to streamline ETL and deliver insights.
- **SQL** - Proficient in querying, cleaning and managing large datasets with advanced joins, subqueries and data modeling.
- **Power BI** - 2+ years of experience designing and delivering end-to-end Power BI dashboards for multiple clients. Expertise in data modeling, transformation, and building interactive reports that provide actionable insights. Proven track record of translating complex data into clear, client-specific visualizations that drive decision-making.
- **Figma** - Skilled in Figma for content visualization, graphics design and creating engaging data visualizations and presentation decks with intuitive layouts.
- **Snowflake** - Experienced with Snowflake for data warehousing, managing large datasets and optimizing data storage and retrieval for efficient analytics.
- **Alteryx** - Alteryx Advanced Certificate holder, skilled in building automated data workflows, data pipelining and streamlining complex processes to deliver actionable insights.
- **Microsoft Excel** - Proficient in advanced Excel functions like VLOOKUP, MATCH, pivot tables etc.

Work Experience

Orka Advisory, Melbourne, Australia

ESG Analyst (Internship)

09/2025 - Current

Key Responsibilities:

- Conducted ESG research and data analysis to evaluate sustainability performance.
- Prepared and reviewed ESG reports aligned with global standards (GRI, SASB, TCFD).
- Supported integration of ESG factors into investment and business strategies.
- Monitored ESG trends and benchmarks to identify risks and improvement opportunities.

DataCrunch Ltd, Bangladesh

Data Analyst

03/2023 - 01/2025

Key Responsibilities:

- Developed and automated data workflows using Alteryx, streamlining complex processes for clients.
- Designed and built dynamic dashboards in Power BI to deliver actionable insights tailored to client needs.
- Contributed to the company's portfolio by leading multiple data analytics projects, showcasing the startup's capabilities.

Cross-functional Contributions:

- Collaborated with the marketing and engagement team as a Content Visualizer, creating data-focused presentation decks, LinkedIn posts and visual content.
- Ensured branding consistency and data storytelling excellence through the use of Figma and other visualization tools.

Achievements:

- Earned promotion to Senior Data Analyst within one year, demonstrating exceptional performance and initiative in a fast-paced startup environment.
- Played a pivotal role in expanding the company's service offerings and internal efficiencies.

Education

- Master of Data Science, 2026, La Trobe University, Melbourne, Australia
- Bachelor of Science in Computer Science, 2024, BRAC University, Bangladesh [CGPA: 3.73]

Projects

Analytical Reports:

Developed analytical reports by gathering, cleaning, and transforming data, delivering insights through visualizations that highlight key trends and patterns.

- BRICS vs. G7: A Comparative Overview
In January 2024, BRICS expanded by adding five new nations, sparking discussions about a shift in global power dynamics. As BRICS explores alternatives to the US dollar for trade, this project compares BRICS and G7 using key economic and demographic metrics to assess their global influence and the changing relations between the two organizations.
- The Significant Risks of Antibiotic Misuse and Overuse
This project explores antibiotic misuse and overuse in Bangladesh, focusing on its contribution to antimicrobial resistance (AMR). It analyzes consumption patterns, driving factors, and proposed interventions to tackle the public health crisis, highlighting the urgency of preserving antibiotic effectiveness.
- Financial Analysis of Grameenphone vs Robi
This study provides a comparative analysis of Grameenphone and Robi Axiata, the two leading telecom companies in Bangladesh. Grameenphone holds a 43% market share with 81.1 million subscribers, while Robi has a 31% share with 56.4 million subscribers. The analysis is based on their 2022 financial statements.

Demo Dashboard:

Designed a detailed demo dashboard for a multi-department organization to showcase advanced Power BI dashboarding skills. The demo highlighted key metrics and provided interactive, data-driven insights, demonstrating the potential of Power BI for cross-departmental decision-making.

Creative Projects:

Created unique projects that highlight creativity in data visualization and storytelling, showcasing innovative approaches to presenting complex data in an engaging and easily understandable way. These projects demonstrate the power of visual design in transforming data into actionable insights.
